

*Be **litigation ready** with **Discovery Mining**, a single comprehensive solution for **email and unstructured data collection, archiving, and compliance** with full search.*

### Solution

Discovery Mining offers an easy-to-use email archiving system that helps enterprises meet compliance requirements and be prepared for litigation. No explicit actions are required by individual users. By utilizing intelligent filters, and search-and-retrieval capabilities, the solution allows firms to build a searchable, compliant email repository for a fraction of the cost of a typical compliant enterprise repository solution.

Everything from data collection, deduping, retention policies, culling via online review, exports to other systems, etc. is solved with our comprehensive and cost-effective solution.

### Features

- 100% automatic email capture from Exchange, Lotus Notes, etc.
- Background capture of over 250 file types from in-house servers.
- Data reduction by deduping and smart keyword filtering.
- Compliance, retention and smart foldering by fully customizable rules.
- Powerful high-speed search and retrieval. Access any email or, set of emails, in seconds.
- Search by word, phrase, name, email address, date range, meta data, proximity, attachment, etc.
- Easy utilization of Boolean operators to enhance search effectiveness.
- Optional conceptual searching.
- Export of load files for 3rd-party litigation support systems.
- Immediate switch-to-litigation-support via a "Halt Destruct" button.

### Pricing

Our simple pricing structure is composed of:

- One-time enterprise setup fee
- Monthly per-user fees that include 2 GBs of storage, and
- Monthly per-gigabyte storage fees for storage in excess of 2 GBs.

Discounts are available based on the number of users and total storage volume required.

### Summary

Eliminate email archival and compliance headaches with Discovery Mining and be prepared to respond to any litigation that arises.

### About Discovery Mining, Inc.:
